WORK EXPERIENCE

PROGRAMMER
2015 - 2017

ALTURAS GROUP OF COMPANIES
- Building and Maintainance of Application Software.
- Following flowchart provided by the System Analyst.
- Conducting reviews, user acceptance tests and finalizing project then provide trainings to end-users at the start of the implementation.

Online TOR & RFS (Php, jQuery, MySQL**)**
Is use for monitoring setup requests from different subsidiaries for adding users, new items, new customers, change prices and chart of accounts and also monitoring transaction override requests for reprints, adjustments and authority to cancel. Users can attach files and export reports to excel for printing.

Employees Credit (Php, MySQL, Android Java**)**
Is use for collecting the credit items of employees both online and offline. In-charge will setup the items to be credited (name, quantity, take photo, expiry date, etc.). Batch in-charge will be bringing a tablet for offline collection and will walk around to different subsidiaries to collect employees credit items. In-charge will then export the credited items to csv for POS transaction. Employees can request credits using web browsers and android tablet (choose items, checkout then affix their signature).
